

ALGEBRA II JOURNAL
Trigonometry

1. Define the six trigonometric functions in terms of x , y , and r .

2. Label each quadrant with the trigonometric functions that are positive in that quadrant.

3. Write the value of each trig function for the given angles.

Deg	Rads	$\sin \theta$	$\cos \theta$	$\tan \theta$
0°				
30°				
45°				
60°				
90°				

4. Write the definitions of sine, tangent, and cosine in terms of opposite, adjacent, & hypotenuse.

5. List the 8 Fundamental Trig Identities.

- | | | |
|----------|----------|----------|
| 1. _____ | 4. _____ | 6. _____ |
| 2. _____ | 5. _____ | 7. _____ |
| 3. _____ | | 8. _____ |

6. List the 3 negative angle identities.
